

**EXPERIMENT NO. 10**

**SEMESTER: V**

**DATE OF PERFORMANCE: 03<sup>rd</sup> October 2024**

**SUBJECT: CN Lab**

**DATE OF SUBMISSION: 11<sup>th</sup> October 2024**

**NAME OF THE STUDENT: David James Eluvathingal      ROLL NO.: 22**

<b>AIM</b>	Perform remote login using FTP server
<b>LEARNING OBJECTIVE</b>	To understand how to perform file access, upload, and download using FTP.
<b>LEARNING OUTCOME</b>	The student will transfer/retrieve the files from client to server.
<b>COURSE OUTCOME</b>	CSL502.6: To learn the basic commands of FTP and explore how the protocol works in client-server communication.
<b>PROGRAM OUTCOME</b>	PO1,PO5,PO9,PO10,PSO1,PSO2,PSO3
<b>BLOOM'S TAXONOMY LEVEL</b>	Create
<b>Theory</b>	<p><b>Step-1: (Configuring Router0):</b></p> <ol style="list-style-type: none"><li>1. Select a 2911 Router from Network Devices and drag and drop to the workspace.</li><li>2. Select Router0 and Go to Config.</li><li>3. Configure the GigabitEthernet0/0 by assigning IP address as 192.168.1.1 and subnet mask as 255.255.255.0 and turn on the port status</li><li>4. Configure the GigabitEthernet0/1 by assigning IP address as 10.0.0.1 and subnet mask as 255.0.0.0 and turn on the port status.</li></ol> <p><b>Step-2: (Configuring PCs)</b></p> <ol style="list-style-type: none"><li>1. Select two PC-PT type PCs from End devices and drag and drop to the workspace.</li><li>2. Select PC0 and go to FastEthernet0 in config and assign IP address and subnet mask for the PC0 as 192.168.1.2, 255.255.255.0</li><li>3. Select PC1 and go to FastEthernet0 in config and assign IP address and subnet mask for the PC1 as 192.168.1.3, 255.255.255.0</li><li>4. For both the PCs (PC0, PC1) go to Global settings in config and Assign default gateway as 192.168.1.1</li></ol> <p><b>Step-3: (Configuring Server0):</b></p> <ol style="list-style-type: none"><li>1. Select a server from End devices and drag and drop to the workspace.</li><li>2. Go to the global settings in config and assign default gateway as 10.0.0.1</li><li>3. Go to FastEthernet0 and assign IP address and subnet mask as 10.0.0.2, 255.0.0.0</li><li>4. Go to services and open FTP Service.</li></ol>

**Class: T.E Comps (Sem V)**

**Lecturer: Varsha Kulkarni**

**Subject: CN Lab**

**Don Bosco Institute of Technology, Kurla**  
**Academic Year 2024-25**

5. Go to user setup and create a username and password.
6. Select all the permissions (Write, Read, Delete, Rename, List) and add the user.

**Step-4: (Configuring Switch and Making connections):**

1. Select a 2950-24 Switch from the network devices and drag and drop to the workspace.
2. Connect FastEthernet0 port of PC0 to the FastEthernet0/1 port of switch0 using Copper Straight-Through cable.
3. Connect FastEthernet0 port of PC1 to the FastEthernet0/2 port of switch0 using Copper Straight-Through cable.
4. Connect FastEthernet0/3 port of switch0 to the GigabitEthernet0/0 of Router0 using Copper Straight-Through cable.
5. Connect GigabitEthernet0/1 port of Router0 to the FastEthernet0 of server0 using Copper Straight-Through cable.

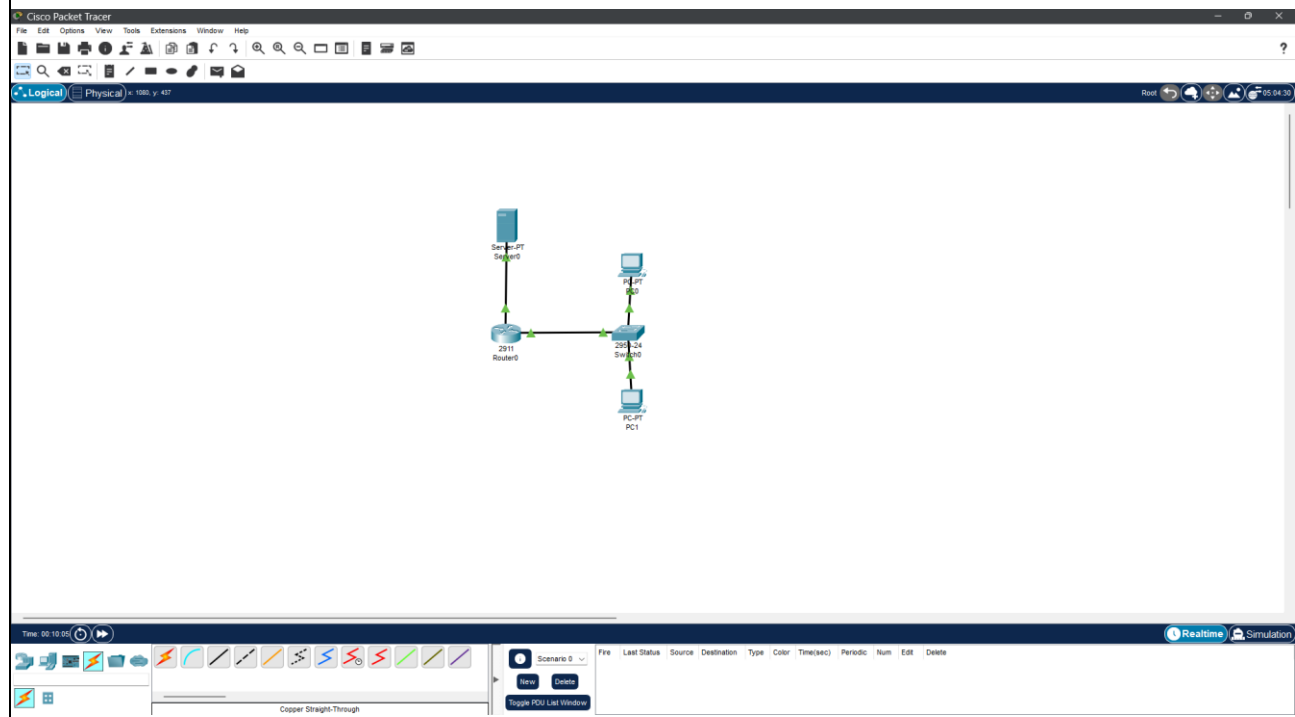

Checking connections from PC0 to the other hosts in the network using ping Command in Command Prompt.

**LAB EXERCISE**

- Checking connections from PC0 to the other hosts in the network using ping Command in Command Prompt.
- Checking connections from PC0 to the other hosts in the network using ping Command in Command Prompt.
- Creating a file named 2.txt for writing(uploading) into FTP Server.

**Append all snapshots here.**

**Output:**

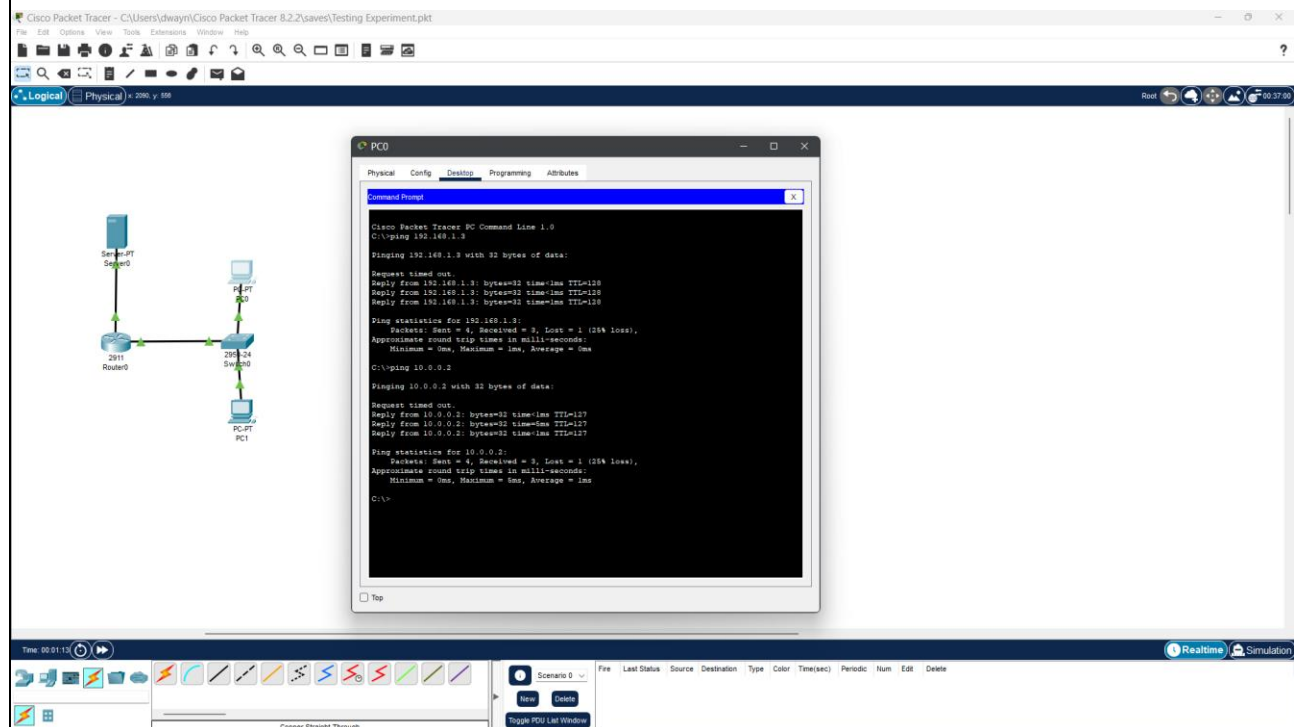

**Class: T.E Comps (Sem V)**

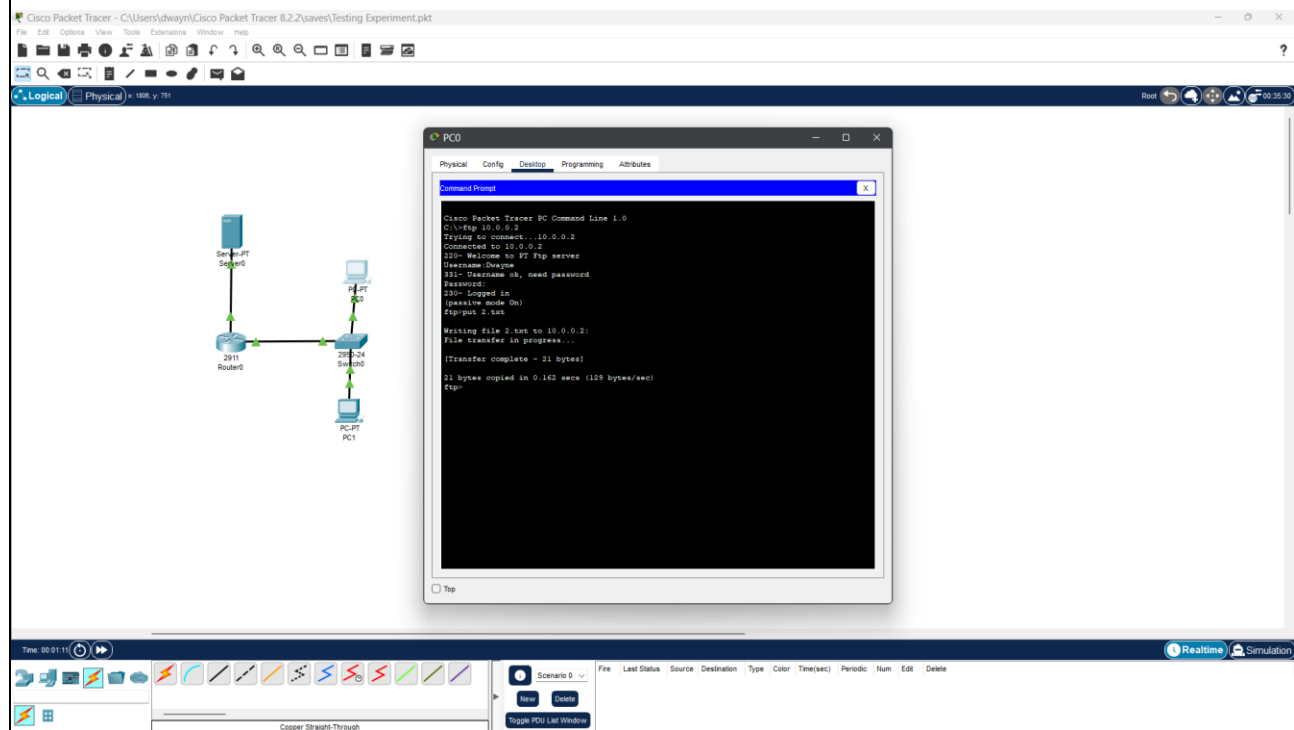

**Lecturer: Varsha Kulkarni**

**Subject: CN Lab**

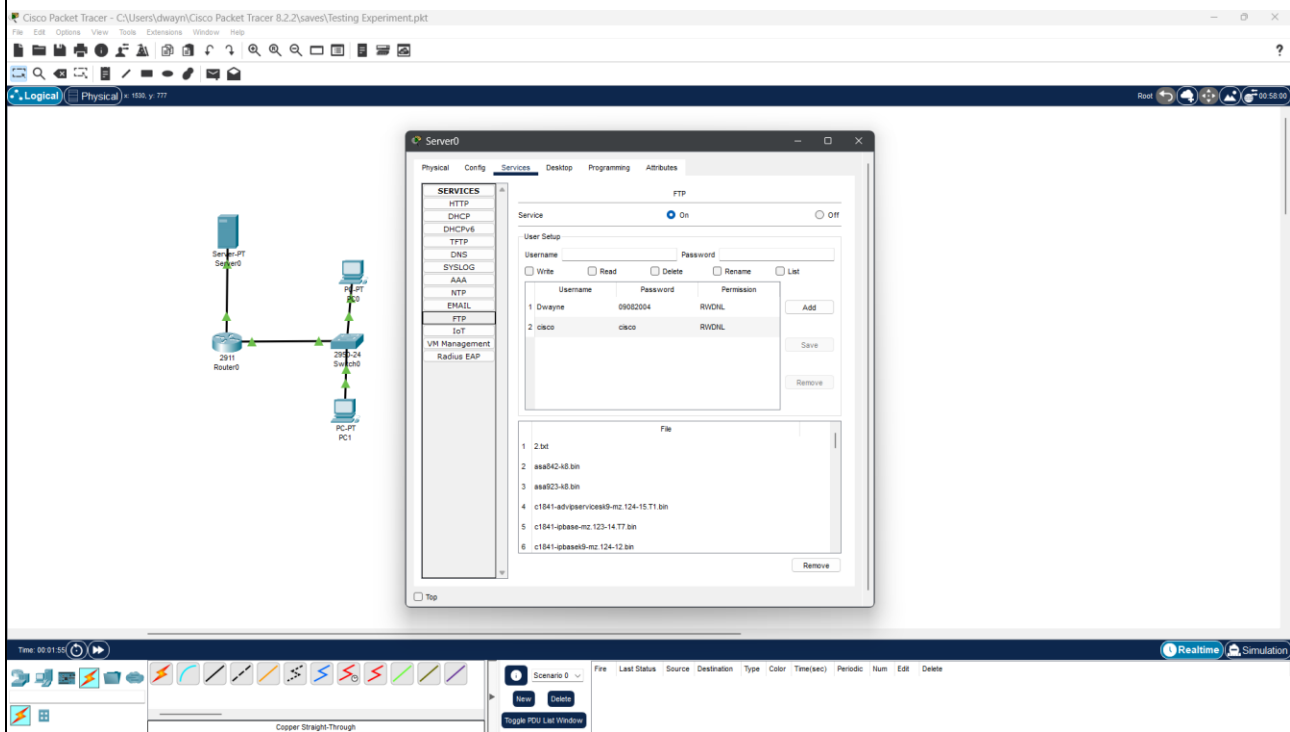

## Checking connections from PC0 to the other hosts in the network using ping Command in Command Prompt.

## Creating a file named 2.txt for writing(uploading) into FTP Server.

**Don Bosco Institute of Technology, Kurla**  
**Academic Year 2024-25**
